

## Long-Term Goal

To build a strong career in Computer Science by developing solid technical skills, gaining practical work experience, and continuously learning new technologies. My goal is to graduate with a strong combination of academic knowledge, practical projects, and professional experience that will prepare me for a successful career in the technology field.

### 01 Gain My First Professional Experience

*Gain practical experience through an internship, training opportunity, or work-based learning experience where I can apply what I have learned at university.*

| STEP                                                 | BY WHEN        | RESOURCES NEEDED                                     |
|------------------------------------------------------|----------------|------------------------------------------------------|
| Complete my CV, cover letter, and career portfolio   | Aug 2026       | University requirements, portfolio platform          |
| Keep my LinkedIn profile professional and updated    | Aug – Sep 2026 | LinkedIn                                             |
| Organize my GitHub and upload suitable projects      | Sep 2026       | GitHub                                               |
| Start applying for relevant internships              | Sep – Dec 2026 | LinkedIn, company websites, university opportunities |
| Gain at least one internship or practical experience | 2027           | Internship applications, university network          |

### 02 Strengthen My Technical Foundation

*Improve the programming and technical skills I am currently learning at university rather than trying to learn too many technologies at once.*

| STEP                                                     | BY WHEN     | RESOURCES NEEDED                       |
|----------------------------------------------------------|-------------|----------------------------------------|
| Strengthen my Java programming skills                    | 2026        | University coursework, coding practice |
| Improve my understanding of Data Structures & Algorithms | 2026 – 2027 | University courses, coding exercises   |
| Practice SQL and database design                         | 2026 – 2027 | SQL Server, university projects        |
| Improve my HTML, CSS, JavaScript, and PHP skills         | 2026 – 2027 | Personal projects, online              |

resources

Learn Git and GitHub properly

Sep 2026

GitHub, tutorials

Explore AI and Cybersecurity fundamentals

2027

Courses, workshops,  
university resources

## 03 Build a Strong Portfolio

*Turn my university projects and activities into a professional portfolio that demonstrates what I can actually do.*

STEP

BY WHEN

RESOURCES NEEDED

Complete my digital career portfolio

Aug 2026

Portfolio platform

Add InsurePro, Luxora, UniTrack, and Global Shipping

Aug 2026

Project information

Organize my GitHub repositories

Sep 2026

GitHub

Add certificates and volunteering experiences

Aug 2026

Certificates, CV

Create at least one additional personal project

2027

GitHub, VS Code

Continue updating my portfolio as I gain experience

Ongoing

Portfolio, GitHub, LinkedIn

## 04 Develop My Professional Skills

*Improve the communication, teamwork, organization, and problem-solving skills that are important in both university and the workplace.*

STEP

BY WHEN

RESOURCES NEEDED

Participate in university projects and group work

Ongoing

University courses

Continue volunteering at university and technology events

Ongoing

BAU, technology events

Improve my communication and presentation skills

2026 – 2027

Presentations, workshops

Improve my time management

Ongoing

Calendar, study planner

Practice professional interviews before applying for internships

Before  
applications

Mock interviews, career  
resources

# 05 Prepare for My Career After Graduation

Gradually prepare myself for employment by gaining experience and understanding which areas of Computer Science I enjoy most.

| STEP                                                                     | BY WHEN       | RESOURCES NEEDED                           |
|--------------------------------------------------------------------------|---------------|--------------------------------------------|
| Explore different areas of Computer Science through projects and courses | 2026 - 2027   | University courses, online resources       |
| Gain internship/work experience before graduation                        | 2027 - 2028   | Internship applications                    |
| Build relationships with professionals and university alumni             | Ongoing       | LinkedIn, university events                |
| Attend technology events and workshops                                   | 2026 - 2028   | DevFest, LCPC, BAU events                  |
| Graduate with a strong portfolio and practical experience                | By graduation | University, internships, personal projects |
